

Raphael Coeffic

AI & Full-Stack Developer

☎ 0534239273 | ✉ racoeffic@gmail.com | 🌐 coeffic-raphael | 📄 Raphael Coeffic

Summary

AI Engineer and Full-Stack Developer with experience in software engineering, backend development, machine learning, automation platforms, and cybersecurity projects. Built scalable full-stack applications and AI systems using Python, React, Flask, MongoDB, and modern software architectures.

Experience

Twains

2025 – 2026

Full Stack Developer – Contract Mission

Remote

Stack: Python, React, Flask, MongoDB Atlas, Clerk, Zustand, React Query, Vercel

- Worked on a multi-tenant WhatsApp automation platform using React, Python and MongoDB
- Implemented authentication, organization isolation and security hardening.
- Improved frontend architecture with Zustand and React Query.
- Contributed to backend refactoring and MongoDB workflow persistence.

Private Programming Tutor

2023 – Present

Java, Python, C#, Algorithms

Israel

- Teach programming and algorithms to university and high-school students.

GNF Group

2022

Software Tools Developer, HTML, CSS, PHP, phpMyAdmin

Remote

- Developed internal tools to organize and manage customer information for an energy renovation company serving French clients.

Projects

AI.Coeff – AI Business Automation Platform | *Python, Flask, APIs, PDF Generation, MySQL, OpenRouter, Hostinger VPS*

- Developed AI business tools including automated quote generation, lead generation, and workflow automation for SMEs.
- Implemented dynamic pricing logic, PDF generation, and API integrations.

MSI Malware Detection System | *Python, Machine Learning, Docker, FastAPI, LightGBM, Redis*

- Developed a static malware detection system for MSI installers using machine learning techniques.
- Implemented feature extraction, distributed processing architecture, and model inference pipelines.

WorkConnect | *Java, Android Studio, Firebase, Firestore*

- Developed features for a professional networking application using Firebase Authentication and Firestore.
- Implemented chat modules and workflow management functionalities.

Is Baby Hungry? | *Python, PyTorch, XGBoost, CNN14, Librosa*

- Built a baby cry classifier using CNN14 audio embeddings and machine learning models to detect hungry vs not-hungry states.
- Performed exploratory data analysis, feature analysis, leakage-free validation, and model comparison across classical ML and fine-tuning approaches.

Lead Generation AI Agent | *Python, Automation, Streamlit, Google Places API, Pandas*

- Built automation tools for business lead extraction and enrichment.
- Generated prospect databases and automated email workflows.

Education

Ariel University

2023 – 2026

B.Sc. Computer Science

Israel

Relevant coursework: Algorithms, Operating Systems, AI, Cybersecurity, Data Structures

Military Service – Golani Brigade

2019 – 2022

Combat Soldier

Technical Skills

Programming Languages: Python, Java, C, C++, C#, PHP

Backend & Databases: Flask, FastAPI, REST APIs, MongoDB, SQL, MySQL, Firebase

Frontend: React, HTML, CSS, Zustand, React Query

AI / ML: Machine Learning, OpenRouter APIs, Hugging Face, Computer Vision, YOLO, SAM, PyTorch, XGBoost, LightGBM

Tools & DevOps: Git, Docker, Linux, Vercel, AWS S3

Concepts: OOP, Algorithms, Data Structures, Communication Networks, Testing, Cybersecurity

Languages

Hebrew: Native | **French:** Native | **English:** Fluent

Academic Achievements

Operating Systems: 100 | **Software Engineering:** 97 | **Logic:** 95 | **Data Structures:** 94 | **Databases:** 92
